Summary

Final-year Electronics and Communication Engineering undergraduate at IIIT Noida with hands-on full-stack development experience across React.js, Node.js, and Python. Proven track record of independently designing, building, and deploying production web applications — from a real-time collaborative grocery platform with WebSocket sync to a live faculty portfolio for an institutional director. Looking to apply a strong problem-solving mindset and builder's instinct to a Software Engineering role.

Technical Skills

- Languages:** Python, C++, JavaScript, SQL, HTML5, CSS3
- Web Development:** React.js, Node.js, Express.js, Socket.IO, Tailwind CSS, REST APIs
- Databases & Tools:** MongoDB, MySQL, Git, GitHub, Postman, OpenCV, Scikit-Learn
- RF & Hardware:** HFSS, MATLAB, VNA (Vector Network Analyzer), Cadence Virtuoso, Proteus

Projects

Cartel — Group Grocery Ordering Platform [🔗](#) [📄](#)

React.js, Node.js, Socket.IO, Tailwind CSS

- Architected a real-time collaborative ordering web platform enabling hostel and roommate groups to join via 6-digit session codes and curate shared grocery carts simultaneously with live bi-directional WebSocket state sync.
- Engineered an automated bill-splitting engine supporting individual items, open cost splits with opt-in mechanics, proportional delivery/platform fee distribution, and real-time group payment tracking.
- Built a responsive mobile-first dark UI with interactive demo bot simulation; deployed live on Render (cartel-f4hf.onrender.com).

Prof. Shweta Srivastava — Academic Portfolio [🔗](#) [📄](#)

React.js, Vite, Responsive CSS

- Independently designed, developed, and deployed an end-to-end academic portfolio website for Prof. Shweta Srivastava, Director at IIIT Noida, structured from her verified curriculum vitae.
- Built high-performance, reusable React components with smooth section navigation and mobile-responsive layout; deployed live in production on Vercel (prof-shweta-srivastava.vercel.app).

Girvi Len Den — Loan & Interest Ledger App [📄](#)

HTML5, CSS3, JavaScript, localStorage

- Built an offline-first loan tracking web application featuring vintage typography and intuitive ledger workflows, supporting dynamic per-entry interest rates, category selection, and automated balance calculation.
- Implemented localStorage persistence and one-click Excel sheet export, enabling seamless record management for non-technical users completely offline.

Interest Calculator [📄](#)

JavaScript, DOM Manipulation, SheetJS

- Engineered a modular JavaScript calculation tool supporting custom interest schedules across flexible date intervals and categories, handling edge cases such as leap years and mid-tenure rate adjustments gracefully.
- Developed interactive tabular data views with client-side spreadsheet export capabilities for instant financial summaries.

Education

Jaypee Institute of Information Technology (IIIT)

B.Tech. in Electronics and Communication Engineering

Noida, India

July 2023 – Present

P.M.S. Public School

Class XII (CBSE)

Moradabad, India

Mar 2022 – Mar 2023

Certifications & Training

- AI Agents Intensive** (Google / Kaggle) — Autonomous agent workflows, prompt design, and GenAI prototyping
- Java Programming** (IIT Bhubaneswar) — OOP principles, exception handling, data structures, and algorithms
